# FCF Embedded Web Software New Technology (EWT)

- **FCF Embedded Web software new technology won the NASA Software of the Year award for 1998**
- **Allows networks of *embedded* control computers to communicate to each other and to outside users via *platform independent* "internet" technology**
- **Greatly simplifies programming of large systems containing many computers such as FCF — software cost can be cut in half**
- **Dramatically lowers risk of introducing new hardware and software to existing system, provided it uses EWT; This is critical in facility with 10 year lifetime**
- **Considered a revolutionary improvement that has been embraced by industry**

**APTF Computers**

**IPSU Computers**

**PI Computer**

**FOMA Computer**

**Astronaut's Portable Computer System**

**IOP Computer**

**Tied together by EWT communications**
